PROFILE

ISTQB-certified QA Engineer with 4 years of experience testing Forbes web, mobile and API products in Agile/Scrum teams. Skilled in functional, regression, smoke, sanity and exploratory testing, cross-browser and cross-device testing on iOS and Android, REST API testing with Postman, and defect tracking in Jira. Build Playwright/TypeScript automation with the Page Object Model, and mentor and on-board new QA team members.

CORE SKILLS

Testing: Functional, regression, smoke, sanity, exploratory, cross-browser, cross-device and cross-platform testing, test planning, defect lifecycle
Mobile and API: Android and iOS (TestFlight, Firebase builds), REST API testing, Postman, Swagger, Charles, SQL, JMeter
Automation: Playwright, TypeScript/JavaScript, Page Object Model, GitHub Actions, Jenkins (basic)
Tools: Android Studio, Xcode, Logcat, Datadog, Git/GitHub, Browser DevTools, Jira, TestRail
Process and AI: Agile/Scrum, QA mentoring; Claude, ChatGPT, GitHub Copilot, Cursor
Languages: Armenian (native); English, Russian, Hebrew (advanced); Arabic (upper intermediate)

WORK EXPERIENCE

Optimum Partners EVN | Software and Quality Engineer | 2022 – Present

- **Forbes Home Page and Lists:** test the home page UI and editorial Lists (30 Under 30, 50 Over 50, Top Colleges) across browsers and devices, running functional, regression, smoke, sanity and exploratory testing for every release
- **Forbes Mobile App:** test the Android and iOS apps on real devices, Android Studio and Xcode, TestFlight/Firebase builds so releases work on every platform
- **User Engagement and Management Centre:** test subscription and registration flows end to end across web and mobile
- **Forbes API Backend:** test REST APIs directly with Postman and Swagger, catching data and status code issues before they reach users
- **Digital Assets and Advertising Operations:** test Web3, crypto and NFT features and the advertising operations platform
- Plan testing and track defects through their lifecycle in Jira, using Git/GitHub and browser DevTools to investigate; work with developers in Agile/Scrum teams to find root causes and get bugs fixed faster
- Design and maintain Playwright end-to-end tests in TypeScript using the Page Object Model, making regression testing faster and easier to maintain
- Lead day-to-day QA work on Forbes projects (assign tasks, track progress), mentor and on-board new QA team members, and release changes and bug fixes to production

Yerevan State University | Hebrew Language Lecturer | 2016 – 2024

- Hebrew teaching, curriculum planning and documentation

PROJECTS

Forbes Platform (Optimum Partners EVN): Home page UI; Lists (Forbes 400, 30 Under 30, 50 Over 50, Top Colleges); User Engagement and Management Centre (subscription, registration); mobile app (Android and iOS); API backend; Digital Assets (Web3, crypto, NFT); Advertising Operations
demowebshop-POM | github.com/Zaruhi-Antonyan/demowebshop-POM: Automated UI test suite for an e-commerce demo site using the Page Object Model for maintainable, reusable scripts
jsonplaceholder-API | github.com/Zaruhi-Antonyan/jsonplaceholder-API: Automated API tests validating CRUD operations, response schemas and status codes
Booker-API | github.com/Zaruhi-Antonyan/Booker-API: Automated API tests for a hotel booking service: authentication, booking creation, updates and deletion

CERTIFICATION AND COURSES

ISTQB Certified Tester, Foundation Level (CTFL) | QA Manual, BDG, Yerevan | QA Automation with Playwright JavaScript/TypeScript, AITC, Yerevan
